- 13. Iconography - 11 cards

01. Origins

How the world begins, or how its inhabitants believe it begins.

- actual creation;
- transmitted stories;
- official version;
- hidden version;
- visible traces in the present;
- taboos and contradictions.

1. World creation

How did the world come into being? Divine creation, cosmic accident, catastrophe, organic birth, artificial world, recycled world, or unknown origin.

2. Founding myth

What the inhabitants tell about the origin of the world. The myth may be true, false, simplified, fragmentary, or manipulated.

3. Official version

What powers, priests, schools, archives, or elders transmit.

4. Hidden version

What has been forgotten, erased, forbidden, or distorted. This version may contradict the world's accepted story.

5. Original catastrophe

The founding rupture: fall, flood, first war, extinction, exile, separation of peoples, loss of a territory, disappearance of a magic or technology.

6. Golden age

What the world believes it has lost. It may be a real, reconstructed, fantasized, or politically used past.

7. First peoples

Who was there at the beginning: gods, ancestors, giants, talking animals, first civilization, machines, spirits, or vanished people.

8. Place of origin

The source point of the world: sacred mountain, primordial sea, world-tree, crater, first city, initial island, cave, fallen star, laboratory, or ruin.

9. Visible trace

What concretely remains in the present: ruins, fossils, scars in the landscape, abnormal stars, relics, monsters, ancient texts, anomalies, or inherited rituals.

10. Origin taboo

What must not be sought, said, or represented: forbidden name, forbidden place, forbidden archive, erased people, sacred lie, or blasphemous question.

11. Core doubt

What does not fit in the origin story: contradictory myths, impossible material proof, a people older than expected, falsified archive, or relic contradicting the official version.

02. Territories

The concrete shape of the world.

- overall map;
- territories;
- inhabited places;
- borders and passages;
- routes and circulation;
- natural constraints;
- sacred, dangerous, or forbidden places.

1. Overall map

The general shape of the world: continents, seas, islands, mountains, great empty spaces, central areas, and margins. This card sets the global image before the details.

2. Continents

The world's large physical units: continents, archipelagos, plateaus, deserts, oceans, mountain ranges, or great basins.

3. Regions

Areas more specific than continents: provinces, valleys, plains, forests, coasts, marches, inland countries, or disputed territories.

4. States

The political divisions visible on the map: kingdoms, empires, free cities, protectorates, colonies, confederations, or territories without stable authority.

5. Cities

The world's living points: capitals, ports, villages, citadels, camps, districts, refuges, or places of passage.

6. Borders

What separates or connects territories: natural borders, walls, passes, bridges, gates, straits, rivers, checkpoints, or clandestine passages.

7. Routes

How people move: trade routes, tracks, navigable rivers, sea lanes, tunnels, relay points, dangerous paths, or secret itineraries.

8. Natural constraints

What the territory imposes on its inhabitants: climate, seasons, relief, drought, floods, storms, cold, disease, isolation, or lack of resources.

9. Territorial resources

What places provide: water, food, wood, stone, metals, rare plants, energy, magic, arable land, or strategic positions.

10. Sacred places

Places charged with symbolic or religious value: temples, springs, mountains, graves, trees, ruins, sanctuaries, pilgrimage sites, or forbidden sites.

11. Forbidden places

Areas people avoid: marshes, ruins, contaminated zones, hostile forests, enemy territories, cursed places, chasms, closed islands, or prohibited districts.

12. Ruins

What the landscape keeps from the past: abandoned cities, monuments, erased roads, fortresses, machines, inscriptions, war scars, or misunderstood remains.

03. Populations

Who lives in this world, and how groups define themselves, coexist, rank one another, mix, or exclude one another.

- main peoples;
- species and life forms;
- minority groups;
- classes and castes;
- languages, customs, territories;
- alliances, diasporas, and internal tensions.

1. Main peoples

The peoples or communities that immediately structure the world: dominant majority, neighboring peoples, founding peoples, historical groups, or major civilizations.

2. Species

Intelligent, hybrid, animal, artificial, magical, or monstrous species that take part in the world's organization.

3. Minority groups

Small, marginalized, scattered, or poorly represented communities in the world's official narratives.

4. Classes

How inhabitants are ranked: nobles, workers, slaves, merchants, priests, warriors, untouchables, technical elites, or dominant groups.

5. Lineages

Groups based on descent, name, blood, adoption, house, clan, tribe, or family transmission.

6. Occupations

Groups organized by activity: artisans, guilds, soldiers, scribes, hunters, mages, engineers, healers, merchants, or navigators.

7. Languages

Spoken languages, accents, names, writing systems, gestures, distinctive signs, and ways of recognizing members of a group.

8. Customs

Habits, rites of passage, festivals, taboos, clothing, meals, gestures, or ceremonies that define belonging to a community.

9. Homelands

Places to which groups are attached: land of origin, district, village, kingdom, camp, diaspora, road, or lost territory.

10. Relations

Relations between groups: old alliances, rivalries, contempt, economic dependencies, political marriages, open conflicts, or fragile peace.

11. Diasporas

Displaced, scattered, or uprooted groups: refugees, nomads, settlers, survivors, travelers, peoples without territory, or communities established elsewhere.

12. Internal tensions

Divisions within the same group: generations, classes, rival families, orthodox and dissidents, cities against countryside, elders against moderns.

04. Characters

No predefined card.

05. Political power

Who commands, by what means, with what legitimacy, against which forms of resistance, and how far that power truly reaches.

- form of government;
- legitimacy;
- rulers;
- official and hidden power;
- institutions;
- territorial administration;
- coercion, wealth, propaganda;
- support, resistance, and weaknesses.

1. Form of government

The visible form of power: monarchy, empire, republic, city-state, council, theocracy, oligarchy, dominant clan, colonial administration, or hybrid power.

2. Source of legitimacy

What justifies power in the eyes of the world: birth, election, military force, divine right, tradition, wealth, knowledge, magic, protection, ancient victory, or founding lie.

3. Rulers

The people or functions that embody power: king, queen, emperor, council, religious leader, governor, general, judge, administrator, caste, or invisible authority.

4. Hidden power

The difference between who seems to govern and who actually decides: adviser, caste, bank, army, religion, family, corporation, machine, oracle, or hidden force.

5. Institutions

The structures that organize power in daily life: palace, council, assembly, ministry, temple, army, archives, police, guild, or bureaucracy.

6. Territorial administration

How power controls space: provinces, capitals, governors, local relays, borders, roads, taxes, garrisons, messengers, or official maps.

7. Forces

The means of coercion used by power: army, guard, militia, police, spies, mercenaries, control magic, machines, surveillance, or intimidation.

8. Taxation

What finances power: taxes, tolls, tribute, mines, trade, land, slavery, debts, monopolies, plunder, rare resources, or support from great families.

9. Propaganda

How power tells the story of its own necessity: symbols, ceremonies, monuments, schools, songs, myths, portraits, titles, archives, and official history.

10. Power allies

Groups that support power: nobility, army, priests, merchants, guilds, clans, families, favored peoples, scholars, media, magicians, or foreign powers.

11. Resistance

What contests power: rebels, dissidents, heresies, unions, subject peoples, rival families, distant provinces, bandits, intellectuals, or underground opponents.

12. Regime weaknesses

What can bring down or fracture power: disputed succession, debt, famine, war, scandal, prophecy, corruption, foreign dependency, ecological crisis, or loss of legitimacy.

06. Beliefs

What inhabitants believe to be true, what they practice, what binds them together, what frightens them, and how beliefs shape social and political life.

- living beliefs;
- rites and signs;
- sacred places and objects;
- moral code, taboos, and dissidences;
- real or supposed effects.

1. Core belief

The fundamental idea around which belief is organized: world order, salvation, fault, cycle, balance, debt to ancestors, divine will, harmony with nature, or fear of a higher power.

2. Powers

The entities recognized or feared: gods, spirits, ancestors, saints, demons, natural forces, sacred machines, stars, tutelary animals, or invisible powers.

3. Main myths

The major stories transmitted by the community: exploits, falls, battles, sacrifices, tricks, miracles, curses, sacred heroes, or founding episodes.

4. Rites

What believers actually do: prayers, offerings, sacrifices, songs, pilgrimages, fasts, dances, daily gestures, care practices, readings, or ceremonies.

5. Sacred places

Spaces where belief is concentrated: temples, sanctuaries, trees, springs, mountains, tombs, ruins, houses, pilgrimage routes, or forbidden places.

6. Sacred signs

Material supports of belief: relics, statues, books, masks, talismans, clothing, tattoos, weapons, instruments, colors, emblems, or recognition signs.

7. Religious taboos

What must not be done, said, eaten, touched, represented, or questioned, under threat of fault, shame, exclusion, curse, or collective sanction.

8. Clergy

People who interpret, transmit, or control belief: priests, shamans, oracles, monks, religious judges, diviners, guardians, healers, scribes, or initiates.

9. Festivals

Moments when belief organizes time: festivals, mourning periods, seasons, lunar cycles, mythical anniversaries, forbidden days, rites of passage, or renewal ceremonies.

10. Moral code

What belief asks of individuals: purity, courage, obedience, compassion, asceticism, honor, hospitality, silence, debt, sacrifice, or respect for an invisible order.

11. Dissidences

Competing, deviant, or forbidden beliefs: sects, alternative readings, old religions, marginal prophets, clandestine cults, or dangerous interpretations.

12. Superstitions

What inhabitants practice outside official doctrine: omens, lucky charms, fear of the dead, evil eye, protective gestures, rumors, small rituals, or local beliefs.

13. Relation to power

The relationship between belief and authority: state religion, tolerated cult, theocratic power, control of rites, legitimization of the regime, spiritual resistance, or conflict with institutions.

14. Real or supposed effects

What belief produces in the world: miracles, magic, healing, trances, curses, visions, psychological manipulation, social cohesion, or purely symbolic effects.

07. Resources

What allows the world to hold together materially: resources, production, circulation, dependencies, shortages, and economic power relations.

1. Vital resources

What allows inhabitants to survive: water, food, arable land, livestock, fishing, hunting, salt, wood, energy, shelter, or access to basic care.

2. Rare resources

What creates value or power: metals, spices, stones, fuel, magic, technical knowledge, medicinal plants, artifacts, data, pure water, or forbidden materials.

3. Production

How goods are produced: agriculture, craft, extraction, livestock, fishing, manufacturing, magic, machines, slavery, recovery, or industrial production.

4. Labor

Activities that structure economic life: peasants, miners, artisans, merchants, soldiers, scribes, workers, servants, engineers, healers, smugglers, or rare specialists.

5. Ownership

What can belong to someone: land, houses, tools, bodies, animals, mines, workshops, patents, spells, archives, roads, water sources, or exploitation rights.

6. Currency

The forms of value in use: money, barter, debt, credit, shells, metal, food, work time, prestige, oaths, services, energy, or sacred resource.

7. Trade

The circulation of goods: markets, caravans, ports, fairs, guilds, trading posts, trade routes, gifts, tribute, smuggling, or ritual exchange.

8. Logistics

Concrete means of circulation: roads, rivers, seas, bridges, relay points, pack animals, vehicles, portals, messengers, warehouses, seasons, and transport dangers.

9. Taxes

What inhabitants must pay or return: taxes, rents, corvées, tolls, tithes, tribute, family debts, sacred debts, or obligations toward a power.

10. Inequalities

The distribution of resources: elites, poor people, middle classes, dependents, excluded groups, privileged groups, rich areas, miserable districts, accumulation, or redistribution.

11. Material dependencies

What a group, city, or power cannot do without: outside water, imports, unique ore, forced labor, foreign technology, unstable magic, or fragile routes.

12. Crises

What threatens economic balance: famine, drought, blockade, trade collapse, crop disease, exhausted mines, war, debt, inflation, or natural disaster.

13. Exploitation

Power relations linked to resources: forced labor, monopoly, colonization, abusive extraction, serfdom, usury, corruption, food blackmail, or organized dependency.

14. Parallel economy

What escapes official rules: black market, smuggling, piracy, theft, clandestine barter, forged papers, counterfeit money, illegal networks, or community mutual aid.

08. Knowledge

What this world makes possible.

- knowledge;
- science;
- magic;
- energy;
- objects;
- care;
- communication;
- transport;
- weapons;
- limits;
- access.

1. General technical level

The overall state of available know-how: tools, machines, construction, transport, communication, weapons, medicine, energy, agriculture, or everyday techniques.

2. Laws of the world

What inhabitants know or believe they know about how the world works: matter, energy, bodies, stars, climate, magic, causality, spirits, natural balance, or invisible forces.

3. Magic

Phenomena that exceed ordinary techniques: spells, gifts, rituals, mutations, powers, miracles, occult energy, enchanted objects, or misunderstood forces.

4. Energy sources

What powers techniques or abilities: fire, water, wind, muscles, animals, steam, electricity, crystals, fuels, magic, prayers, sacrifices, or rare resources.

5. Inventions

Important objects in the world: machines, weapons, instruments, vehicles, prosthetics, automata, agricultural tools, magical objects, medical devices, or ancient artifacts.

6. Medicine

How the world understands and treats bodies: medicine, surgery, plants, rituals, healers, anatomy, prosthetics, poisons, diseases, birth, aging, or transformations.

7. Communication

Ways of transmitting information: speech, writing, printing, messengers, signals, archives, books, maps, machines, telepathy, crystals, songs, oral memory, or networks.

8. Transport

Means of movement: walking, animals, boats, carts, trains, vehicles, flying machines, portals, fantastic mounts, roads, navigation, or magical travel.

9. Defense

Means of attacking, protecting, or intimidating: blades, bows, gunpowder, war machines, armor, shields, poisons, spells, protections, fortifications, or surveillance systems.

10. Limits

What technique or magic requires: energy, rare matter, fatigue, debt, sacrifice, pollution, instability, disease, dependency, moral risk, accident, or loss of control.

11. Monopolies

Who has the right to use or possess certain forms of knowledge: elites, army, priests, guilds, excluded poor, forbidden peoples, black market, patent, initiation, family secret, or political monopoly.

09. Rules

What regulates life in common: what is allowed, forbidden, expected, punished, or tolerated.

- official laws;
- justice;
- sanctions;
- customs;
- taboos;
- family and inheritance;
- social statuses;
- collective duties;
- common offenses;
- implicit rules.

1. Official laws

Written or recognized rules of power: prohibitions, obligations, rights, duties, privileges, statuses, and public rules.

2. Justice

How conflicts are judged: court, council, judge, elder, priest, local chief, arbitration, duel, investigation, or arbitrary decision.

3. Sanctions

What happens when a rule is broken: fine, prison, exile, public shame, corvée, mutilation, debt, reparation, banishment, or death.

4. Customs

Collective habits that act as law without always being written: greeting, receiving guests, dressing, eating, negotiating, obeying, marrying, inheriting, or speaking.

5. Taboos

What must not be done, said, shown, touched, or questioned, even if it is not always officially punished.

6. Family

Rules that organize filiation, unions, separations, children, names, transmitted goods, and family obligations.

7. Social statuses

Differences in rights according to birth, occupation, gender, age, caste, wealth, origin, species, or belonging to a group.

8. Hospitality

What each person owes others: welcoming, feeding, protecting, rescuing, avenging, sharing, respecting elders, helping the group, or obeying local authority.

9. Common offenses

Ordinary faults in the world: theft, unpaid debt, lying, blasphemy, desertion, adultery, smuggling, insult, violence, broken oath, or forbidden use of knowledge.

10. Implicit rules

What everyone understands without stating it: who may speak, where to sit, who serves whom, who looks at whom, what must not be contradicted, and what everyone pretends not to notice.

10. Tensions

What rubs against itself in the world, at every scale: power, society, economy, religion, territory, memory, or internal threat.

- main conflict;
- power rivalries;
- social, economic, religious, and territorial tensions;
- legacies of the past;
- threats;
- resistance;
- breaking points;
- fragile peace.

1. Main conflict

The major tension running through the world or the story: war, political crisis, power struggle, oppression, coming catastrophe, religious conflict, old rivalry, or social fracture.

2. Power rivalries

Oppositions between rulers, families, factions, kingdoms, institutions, clans, guilds, armies, or competing authorities.

3. Social tensions

Conflicts between groups: social classes, castes, peoples, species, generations, cities and countryside, elders and moderns, dominant and dominated.

4. Economic tensions

Conflicts linked to resources, labor, debt, poverty, taxes, trade, exploitation, shortage, or access to vital goods.

5. Ideologies

Disagreements around beliefs, values, myths, prophecies, rites, prohibitions, progress, tradition, or official truth.

6. Territorial tensions

Conflicts linked to land, borders, routes, sacred places, forbidden zones, colonies, exiles, migrations, local resources, or lost territories.

7. Past legacies

Old wounds that still act: past war, massacre, betrayal, debt, humiliation, colonization, catastrophe, historical lie, or inherited revenge.

8. External threats

What threatens the world from outside: neighboring empire, invasion, natural disaster, monster, disease, unknown force, rival people, climate change, or foreign power.

9. Internal threats

What weakens the world from within: corruption, conspiracy, revolt, decadence, fanaticism, crime, succession crisis, moral collapse, or broken trust.

10. Revolts

Groups or individuals who contest the established order: rebels, dissidents, strikers, bandits, heretics, resistance fighters, oppressed minorities, or underground opponents.

11. Breaking points

Events capable of tipping the situation: assassination, famine, scandal, lost battle, forbidden discovery, prophecy, betrayal, accident, trial, or catastrophe.

12. Compromises

What still prevents conflict from exploding: treaty, marriage, debt, hostage, balance of power, common fear, trade, religion, provisional alliance, or shared lie.

11. Memory

What the world remembers, forgets, transforms, or hides from its past.

- major periods;
- founding events;
- past wars;
- historical figures;
- collective traumas;
- archives and traces;
- official version;
- hidden version;
- popular memory;
- active legacy.

1. Major periods

The major stages of the past: ancient age, foundation, expansion, crisis, war, fall, reconstruction, recent era, or forgotten period.

2. Founding events

Events that durably structured the world: birth of a kingdom, discovery, migration, battle, alliance, catastrophe, reform, revolution, or betrayal.

3. Past wars

Conflicts that are over but still present in memory: victors, defeated groups, shifted borders, ruins, grudges, heroes, crimes, and traumas.

4. Historical figures

Figures from the past who are admired, feared, imitated, or contested: founders, conquerors, saints, scholars, traitors, martyrs, tyrants, or popular heroes.

5. Collective traumas

Wounds shared by a people or territory: massacre, famine, exile, slavery, epidemic, catastrophe, defeat, occupation, or disappearance.

6. Archives

What preserves the past: texts, songs, ruins, maps, monuments, objects, fossils, tombs, images, oral stories, or transmitted memories.

7. Official version

How power, school, religion, or institutions tell the past: retained dates, chosen heroes, erased faults, designated enemies, and national narrative.

8. Hidden version

What has been forgotten, censored, falsified, or reserved for a few initiates: founding crime, erased people, ancient pact, shameful defeat, political lie, or forbidden truth.

9. Popular memory

What inhabitants actually tell: legends, songs, proverbs, festivals, rumors, superstitions, family memories, or contradictory stories.

10. Active legacy

What in the past still acts on the present: debt, revenge, privilege, border, prophecy, ancient law, monument, trauma, oath, or transmitted conflict.

12. Daily life

How people actually live.

- housing;
- food;
- clothing;
- family;
- work;
- education;
- leisure;
- speech;
- body;
- movement;
- objects;
- time structure.

1. Housing

Forms of habitat and intimacy: house, apartment, hut, palace, tent, dormitory, collective housing, precarious shelter, furniture, heating, room organization, and relation to private space.

2. Food

Common foods, meals, cooking, preservation methods, shortages, food taboos, festive dishes, poor food, or prestige food.

3. Clothing

Clothing according to climate, work, status, age, gender, religion, wealth, season, or social circumstances.

4. Family

Concrete household life and forms of family organization: nuclear family, extended family, stem family, community family, lineage, clan, recomposed household, adoption, cohabitation, parental authority, inheritance, place of elders, mutual aid, conflicts, daily obligations, and transmission between generations.

5. Work

The place of work in the day: schedules, fatigue, places, tools, repeated gestures, chores, apprenticeship, ordinary occupations, and relation to rest.

6. Education

How children grow up: school, apprenticeship, games, tasks, discipline, family transmission, rites of passage, freedom, or supervision.

7. Leisure

Non-working time: games, music, dance, sport, conversations, local festivals, baths, walks, stories, shows, gatherings, and moments of rest.

8. Speech

Ways of speaking and behaving: greetings, titles, insults, formulas of respect, silences, gestures, accents, body distance, and conversational codes.

9. Body

Practices linked to the body: washing, bathing, hair, smells, modesty, beauty, menstruation, birth, aging, illness, ordinary care, and relation to touch.

10. Movement

Ordinary movement: walking, animals, carts, public transport, boats, stairs, alleys, paths, distances, dangers, travel time, and daily constraints.

11. Objects

Objects handled every day: dishes, tools, bags, lamps, keys, baskets, toys, books, ordinary weapons, talismans, repaired clothes, or transmitted objects.

12. Time structure

Collective and individual rhythm: waking, meals, work, prayer, rest, school, curfew, night, seasons, market days, forbidden days, and shared moments.

13. Iconography

Very important for comics.

- colors;
- shapes;
- materials;
- architecture;
- costumes;
- emblems;
- patterns;
- light;
- scale;
- symbols;
- visual taboos.

1. Colors

The world's dominant colors: recurring hues, contrasts, forbidden colors, prestige colors, popular colors, religious colors, political colors, or variations between places.

2. Shapes

Forms that give the world a graphic identity: curves, angles, spirals, verticals, circles, masses, silhouettes, organic motifs, strict geometry, or broken forms.

3. Materials

Visible materials in the world: stone, wood, metal, fabric, leather, glass, bone, clay, vegetation, dust, water, rust, plastic, magical matter, or rare materials.

4. Architecture

Built forms: houses, palaces, temples, districts, ruins, towers, bridges, underground spaces, facades, proportions, materials, ornaments, and relation to the landscape.

5. Costumes

Clothing silhouettes: everyday clothes, power garments, uniforms, religious clothing, protections, headdresses, shoes, jewelry, masks, and status signs.

6. Emblems

Official or collective signs: coats of arms, flags, seals, guild marks, religious symbols, military insignia, tattoos, faction colors, or signs of belonging.

7. Patterns

Recurring graphic motifs: waves, stars, teeth, knots, eyes, hands, roots, feathers, triangles, labyrinths, scars, constellations, or abstract forms.

8. Light

Lighting atmosphere: hard, diffuse, warm, cold, nocturnal, misty, sacred, artificial, magical, underground, maritime, or seasonal light.

9. Scale

Size relationships between beings, places, and constructions: immensity, smallness, monumentality, verticality, gigantism, overwhelming spaces, or tiny details.

10. Symbols

Images charged with meaning: animals, stars, plants, weapons, colors, gestures, numbers, mythical figures, or signs whose meaning varies between groups.

11. Visual taboos

What must not be represented, worn, shown, or looked at: forbidden color, hidden face, banned symbol, sacred image, taboo form, or shameful mark.
